

CLINTON COUNTY

Clinton County Intermediate School District is operating a program called Clinton Career Network (CCN). The purpose is to give the students of the County good exposure to the career opportunities that exist for them and find the resources to pursue their interests. The County has participated in the program and provided some financial support.

The County continues to move forward with the 911 upgrade which needs to be in place before the end of 2021. To make this change we know that the current phone surcharge will be inadequate and we will likely be seeking between .5 and 1 mill cover the 911 costs. In this event the plan would be to do some reduction of the surcharge.

The Clinton County Drain Commissioner has been authorized to contract with Spicer Engineering to enhance the County flood plain maps so as to provide a more precise basis to challenge the mortgage companies who may want to require flood insurance.

Due to a State grant, the April 25th 2020 Clean Community event will be able to accept tires for little or no charge. This event is held at the Clinton County Road Commission facility on S-127.

The County Board of Commissioners have adopted a balanced budget for 2020. This could get somewhat more challenging depending on how the Legislature and the Governor address the vetoes in the State budget.

David W. Pohl, Clinton County Commissioner District 2
